48、 Electric Tractor

1. Suspended seat

New type of suspended seat: adjust the bearing capacity according to the weight, and provide the most comfort.

2. Reliable accelerator

The inner safety switch ensures safer operation.

The service life is more than 10 million times.

3. Big steering angle

Bigger steering angle ensures smaller turning radius and easier operation, and the space utilization ratio is also increased.

4. Beautiful and useful tighten mechanism

The tighten mechanism is installed at the top of the cover, so that the forklift is more beautiful, convenient and useful.

5. Tricolor taillight

The tricolor taillight gives you obvious indications of turning, breaking and reversing, which ensure more safety for both life and property.
